

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	06 july 2026
Team ID	SWTID-2026-8547
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

 10 minutes to prepare
 1 hour to collaborate
 3-8 people recommended

 **Before you collaborate**
A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

 10 minutes

 **Team gathering**
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

 **Set the goal**
Think about the problem you'll be focusing on solving in the brainstorming session.

 **Learn how to use the facilitation tools**
Use the Facilitation Superpower to run a happy and productive session.

[Open guide](#)

 **Define your problem statement**
What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

 5 minutes

Problem

How might we (your problem statement)?

 **Key rules of brainstorming**
To run an smooth and productive session

 Stay on topic.

 Encourage wild ideas.

 Defer judgment.

 Listen to others.

 Go for volume.

 If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorming is the initial stage of project development where ideas are generated to identify a real-world problem and explore possible solutions. It encourages creative thinking and helps select the most feasible project based on user needs and available technology.

During the brainstorming session, several challenges faced by organizations in managing projects were identified. These included manual task assignment, lack of centralized project tracking, delayed approvals, poor communication among team members, and difficulty monitoring project progress.

Various solution ideas were discussed, including a task tracking application, employee management system, inventory management system, and a workflow-based project management system. After evaluating these ideas, a Project Management System using ServiceNow was selected because it provides workflow automation, role-based security, and approval management, making project execution more efficient.

Step-3: Idea Prioritization

The brainstorming process resulted in the selection of a workflow-driven Project Management System that automates task management, approval processes, and access control using ServiceNow.

Priority

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
