Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the core about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barriers exist - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

I am a traveler	I'm trying to book flights on my phone	But it takes a long time	Because The website is not responsive and doesn't have a mobile version	Which makes me feel Frustrated
---------------------------	--	------------------------------------	---	--

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Which makes me feel
Difficulty managing project tasks efficiently	A Project Manager	Track project progress, assign tasks, and manage approvals efficiently	Project information is scattered, approvals are manual, and task tracking takes too much time	Frustrated because project execution is slow and difficult to monitor
Managing user access securely	A System Administrator	Ensure only authorized users can access project data	Managing permissions manually is complex and time-consuming	Concerned about security risks and unauthorized access

Introduction

Many organizations continue to rely on manual methods such as spreadsheets, emails, and paper-based approvals to manage projects. These approaches often lead to communication gaps, delayed approvals, data inconsistency, and reduced productivity.

Problem Description

Project managers face difficulties in assigning tasks, tracking progress, and ensuring timely approvals. Team members lack a centralized platform to monitor assigned work, while administrators struggle to maintain secure access to project information. The absence of workflow automation increases manual effort and the likelihood of errors.

Proposed Solution

The proposed solution is to develop a **Project Management System** using ServiceNow. The application automates project workflows through Flow Designer, manages approvals, updates task status automatically, and secures project data using Access Control Lists (ACLs). This system improves collaboration, transparency, and overall project efficiency.

Objective

To design and implement a secure and automated Project Management System that simplifies project tracking, task management, and approval workflows using ServiceNow.
