

Ideation Phase

Empathize & Discover

Date	07 July 2026
Team ID	SWTID-2026-8547
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	4 Marks

Empathy Map Canvas:

An Empathy Map Canvas is a design thinking tool used to understand users by analyzing their thoughts, emotions, behaviors, and challenges. It helps developers build applications that address real user needs.

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

Example: Food Ordering & Delivery Application

Conclusion

The Empathy Map Canvas highlights the needs and expectations of project stakeholders. These insights guided the development of a ServiceNow-based Project Management System that improves productivity, collaboration, and workflow efficiency.
