

Project Design Phase-II

Data Flow Diagram & User Stories

Date	07 July 2026
Team ID	SWTID-2026-8547
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
User1	Project Management	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
Project Manager	Task Management	USN-2	As a Project Manager, I want task status to update automatically through workflows so that manual effort is reduced.	I can receive confirmation email & click confirm	High	Sprint-1
Team Member	Task Tracking	USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
Administrator	Access System	USN-4	As an Administrator, I want to configure roles and ACLs so that only authorized users can access project information.	Project can be created successfully and stored in the Project Table.	Medium	Sprint-1
Project Manager	Workflow Automation	USN-5	As a user, I can log into the application by entering email & password	Tasks are assigned successfully and visible to the assigned team member.	High	Sprint-1
Project Manager	Approval Workflow	USN-6	As a Project Manager, I want to assign tasks to team members so that work is distributed efficiently.	Tasks are assigned successfully and visible to the assigned team member.	Medium	Sprint-1
Team Member	Task Update	USN-7	As a Team Member, I want to update task progress so that the project manager can monitor completion.	Assigned tasks are displayed only to the respective team member.	High	Sprint-1
Team Member	Security	USN-8	As a Team Member, I want restricted access to sensitive fields so that project information remains secure.	Flow Designer automatically changes the task status to Completed after the workflow runs.	Medium	Sprint-1
Administrator	Access Control	USN-9	As an Administrator, I want to assign roles to users so that permissions are managed efficiently.	Approval request is sent to the designated approver (Alice) and the workflow continues after approval.	Medium	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Project Manager	Project Monitoring	USN-10	As a Project Manager, I want task status to update automatically through workflows so that manual effort is reduced.	Restricted fields cannot be modified without the required role.	Medium	Sprint-1
Team Member	Updation	USN-11	As a Team Member, I want to update task progress so that the project manager can monitor completion.	The latest task status and approval state are visible in the application.	Medium	Sprint-1
User2	Login data	USN-12	As a user, I will receive confirmation email once I have registered for the application	Roles are assigned successfully and take effect immediately.	Medium	Sprint-1
