

Project Design Phase
Proposed Solution Template

Date	07 July 2026
Team ID	SWTID-2026-8547
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Many organizations rely on manual methods such as spreadsheets and emails to manage projects and tasks. This leads to delays, poor coordination, inefficient task tracking, and slow approval processes.
2.	Idea / Solution description	Develop a Project Management System using ServiceNow that automates project and task management through custom tables, Flow Designer workflows, approval processes, and role-based access control (ACLs).
3.	Novelty / Uniqueness	The solution combines workflow automation, automatic status updates, approval management, and secure role-based access in a single ServiceNow application, reducing manual intervention and improving operational efficiency.
4.	Social Impact / Customer Satisfaction	The system promotes transparency, accountability, and effective collaboration among project teams. It reduces human errors, improves communication, and enhances productivity in educational institutions and organizations.
5.	Business Model (Revenue Model)	The application can be implemented by organizations as an internal project management solution. It can also be customized and offered as a ServiceNow-based enterprise application for businesses requiring workflow automation and project tracking
6.	Scalability of the Solution	The solution is scalable and can support multiple departments, projects, users, and workflows. Additional modules such as budgeting, reporting, notifications, dashboards, and analytics can be integrated as organizational requirements grow.
