

User Acceptance Testing (UAT) Template

Date	07 July 2026
Team ID	SWTID-2026-8547
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	30

Project Overview:

Project Name: Optimizing User, Group, and Role Management with Access Control and Workflows

Project Description: The project is a ServiceNow-based application developed to optimize the management of users, groups, and roles through secure access control and workflow automation. It enables administrators to manage user permissions, configure role-based access using Access Control Lists (ACLs), and automate business processes with Flow Designer. The application improves security, reduces manual administrative tasks, and ensures that only authorized users can access or modify project records.

Project Version: v1.0

Testing Period: Start Date: 08 July 2026

End Date: 10 July 2026

Testing Scope:

Features and Functionalities to be Tested

- User creation and management
- Group management
- Role assignment
- Role-Based Access Control (ACLs)
- Project Table functionality
- Task Table 2 functionality
- Workflow automation using Flow Designer
- Automatic task status updates
- Approval workflow
- Application menus and modules
- User impersonation
- Workflow execution
- Security and access validation

User Stories / Requirements to be Tested

- USN-1: Create and manage projects.
- USN-2: Create and assign project tasks.
- USN-3: View assigned tasks.
- USN-4: Configure user roles.
- USN-5: Trigger workflow automatically.
- USN-6: Update task status automatically.
- USN-7: Generate approval requests.
- USN-8: Restrict access using ACLs.
- USN-9: Validate role-based permissions.
- USN-10: Verify workflow completion.

Testing Environment:

Platform: ServiceNow Personal Developer Instance (PDI)

Application: Optimizing User, Group, and Role Management with Access Control and Workflows

Browser: Microsoft Edge

Operating System: Windows 10

URL/Location: <https://dev123456.service-now.com>

Credentials (if required) :

Email: sri38nidhi@gmail.com

Password: Srinidhi...31

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Create a new project	Log in as Project Manager → Open Project Table → Click New → Enter project details → Save	Project record is created successfully.	Project record created successfully.	Pass
TC-002	Verify ACL access	Impersonate Bob → Open Task Table 2	Bob can access only the records and fields permitted by his role.	Access restrictions worked correctly.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Workflow did not trigger after creating a task	Create a task record and wait for the workflow to execute	High	Resolved	Flow trigger conditions were corrected and the workflow was activated
BG-002	Task status was not updating to Completed .	Execute the workflow after creating a task.	High	Resolved	Update Record action was reconfigured to update the correct status field.

Sign-off

Tester Name: Srinidhi

Date: 10 July 2026

Signature: Srinidhi

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
