

## Screenshot evidences

### A. **Requirement Analysis & Planning**

#### 1. User Management

- o Create users Alice and Bob.
- o Assign roles and responsibilities.

#### Group Management

- o Create Project Team Group.
- o Add Alice and Bob as members.

#### Role Definition

- o Create Project Manager and Team Member roles.
- o Assign roles to users.

#### Table Configuration

- o Create Project Table and Task Table 2.
- o Define columns for tasks and projects.

#### 5. Application Access

- o Configure modules for tables.
- o Assign roles for controlled access.

#### 6. Access Control Lists (ACLs)

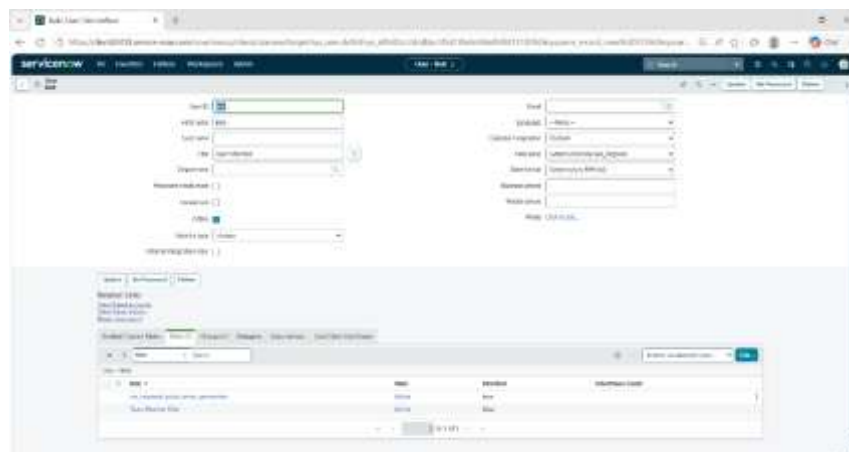

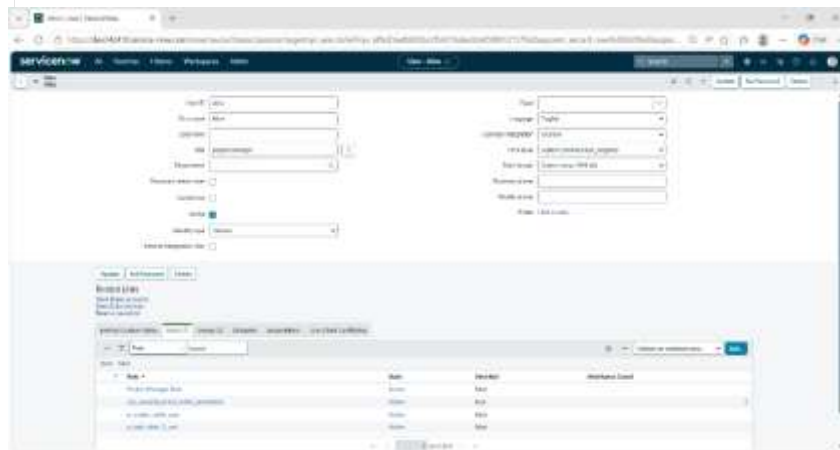

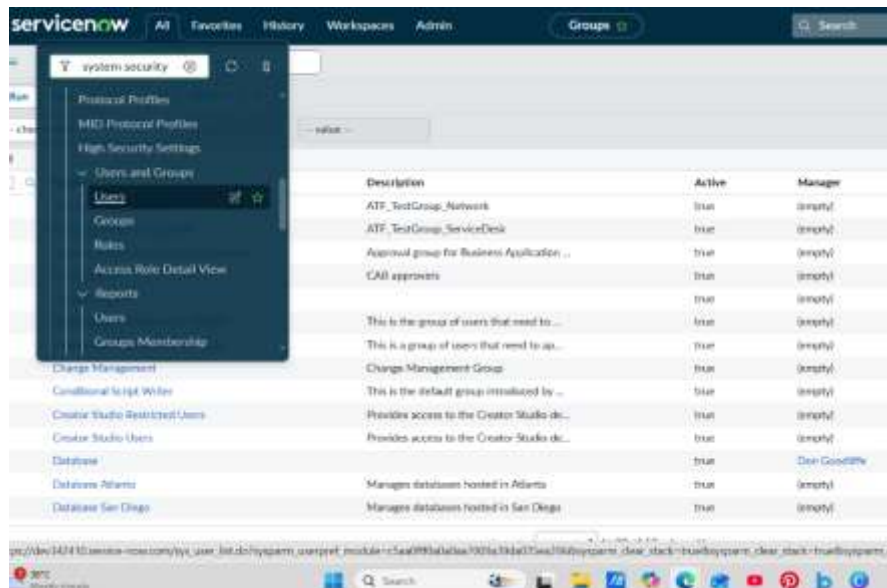

- o Restrict Bob's edit rights to task fields (status, comments).
- o Ensure Alice has full access.

#### 7. Workflow Automation (Flow Designer)

- o Automate task assignment, status updates, and approvals.
- o Notify Alice when Bob completes tasks.

### B. **Core Platform Setup (Users, Groups, Roles)**

#### i. Creation of Users

ii. Creation of Groups

servicenow | All | Favorites | History | Workspaces | Admin | Role - New Record | Search

Role - New record

Name: Project Manager Role

Application: Global

Delegated privileges: ☐

Description: Full access to project and task tables

Submit

servicenow | All | Favorites | History | Workspaces | Admin | Role - New Record | Search

Role - New record

Name: Team Member Role

Application: Global

Delegated privileges: ☐

Description: Restricted access to project and task tables

Submit

## C. Data & Structural Configuration

### i. Create Project Table

servicenow | All | Favorites | History | Workspaces | Admin | Build Agent | Search

Build Agent

Power your workflow applications

Table - New Record

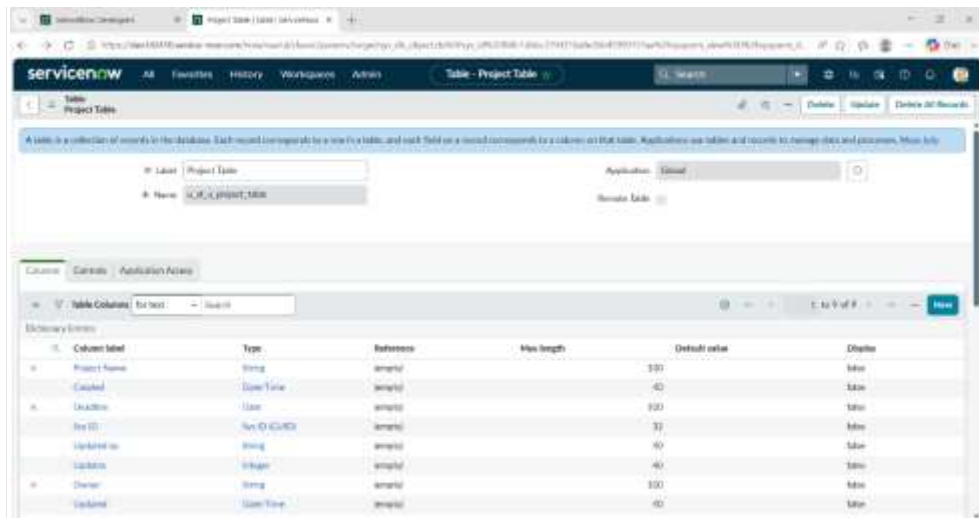

Table Name: Project

Application: Global

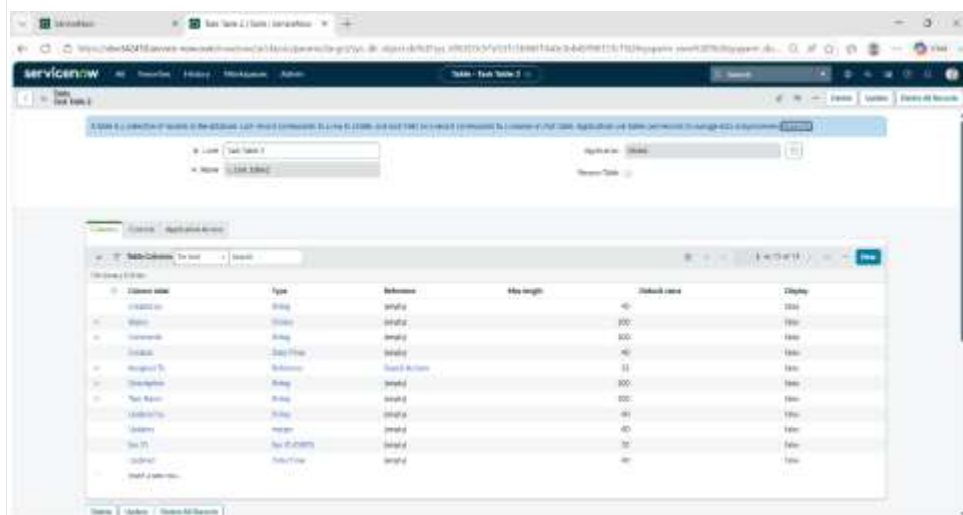

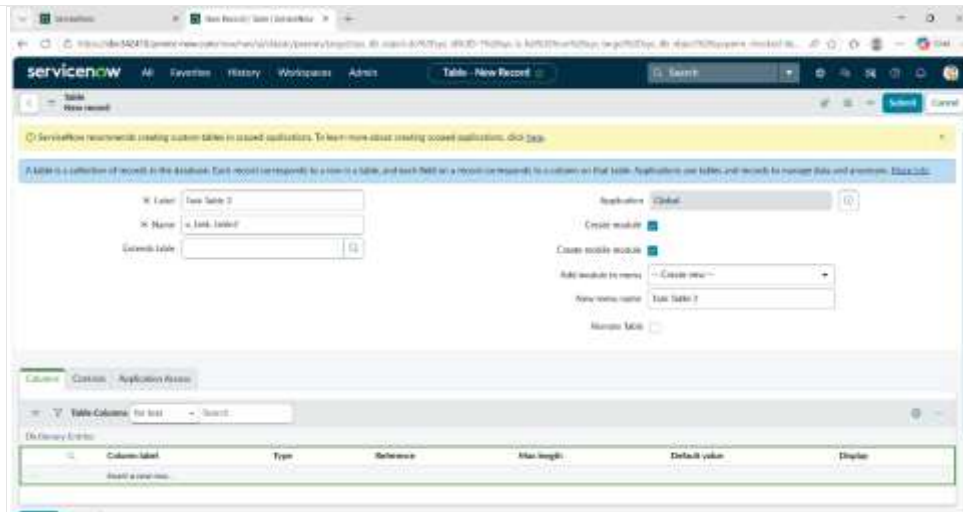

Table Type: Standard Table

Submit

| Column Label | Type | Reference | Max length | Default value | Display |
|--------------|------|-----------|------------|---------------|---------|
| Table Name   |      |           |            |               |         |

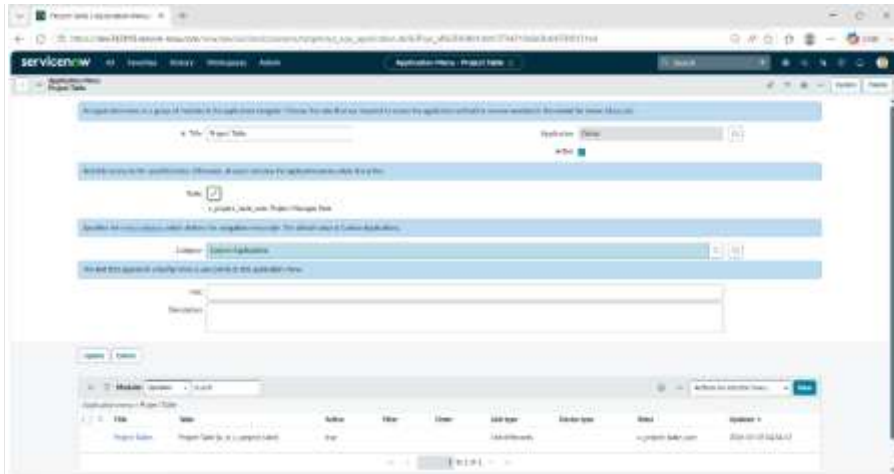

## ii. Create Task Table 2

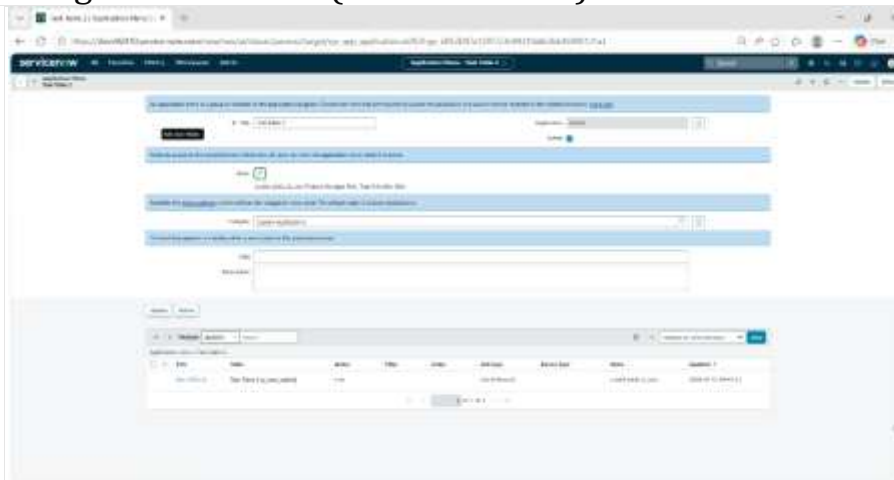

## D.Access Assignment & Governance Enablement

### i. Assign Roles to Alice (Project Manager)

## ii. Assign Roles to Bob (Team Member)

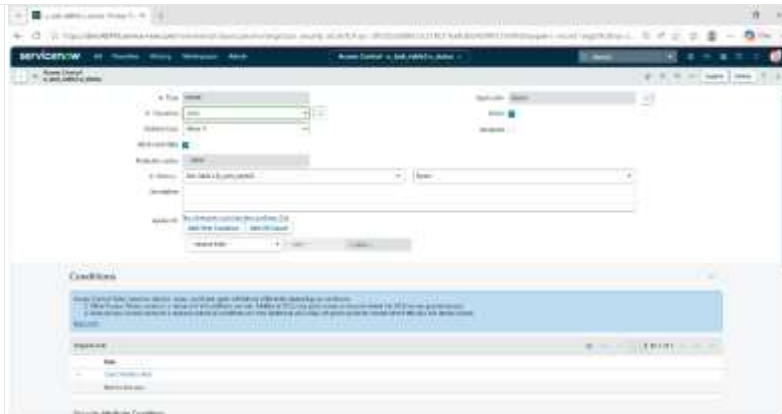

## E. Application Security & Access Enforcement

### i. Assign Table Access to Application

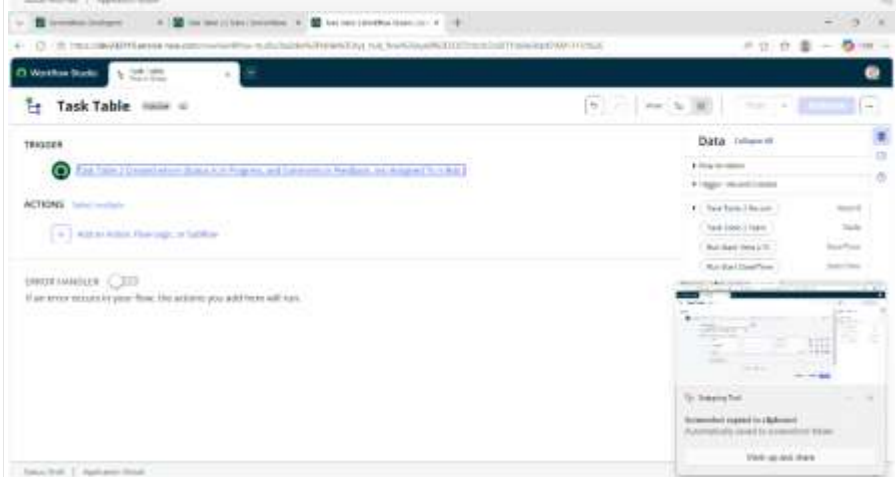

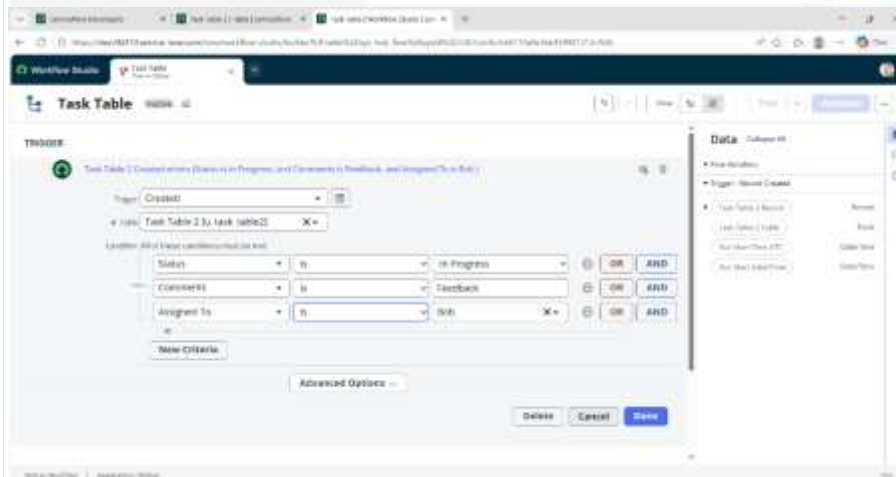

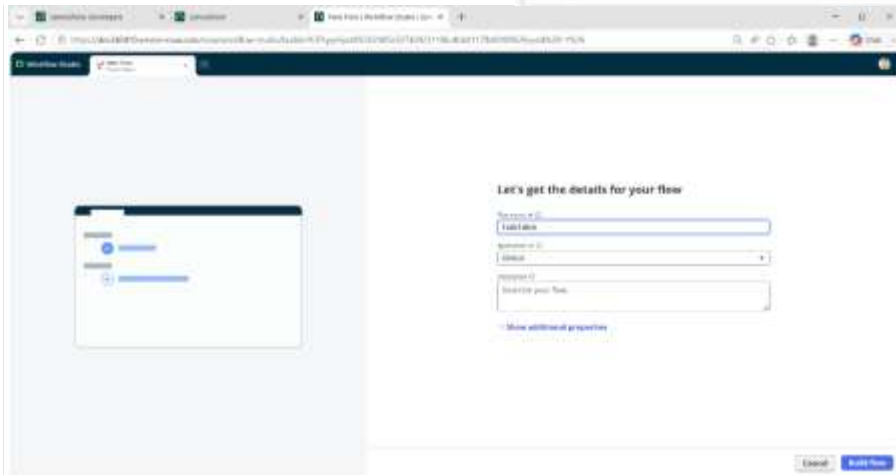

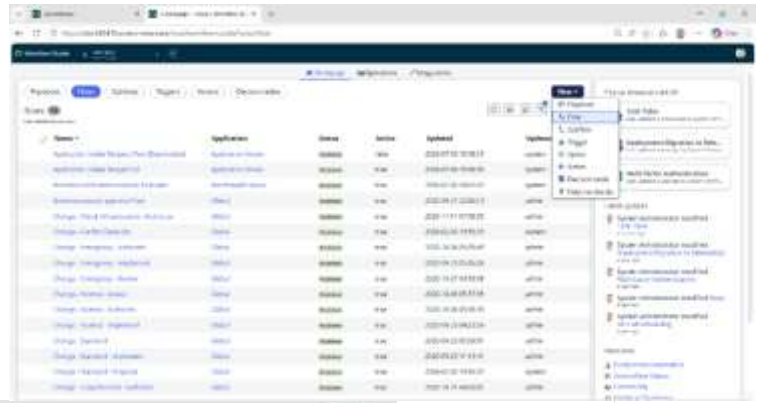

### ii. Create ACLs for Task Table 2

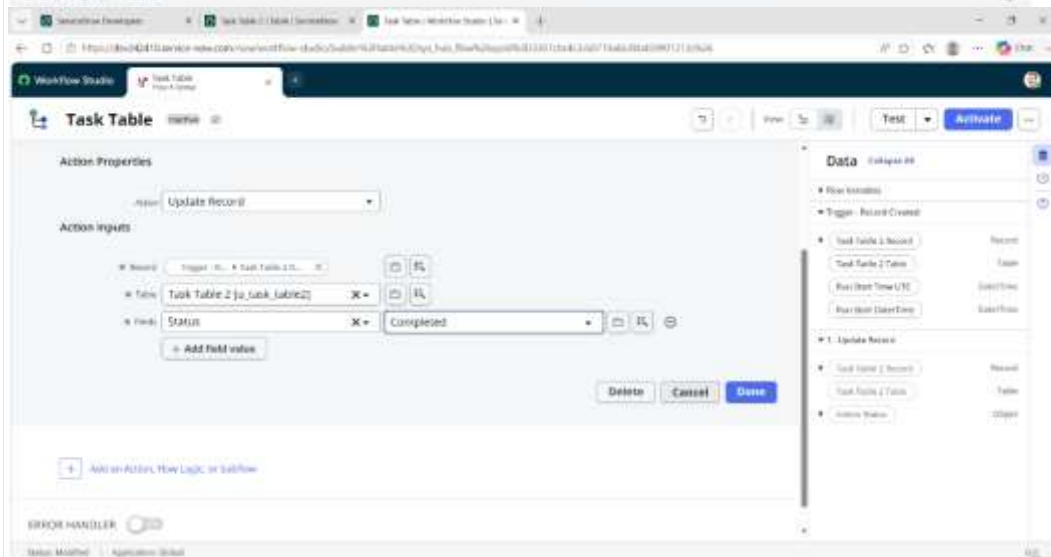

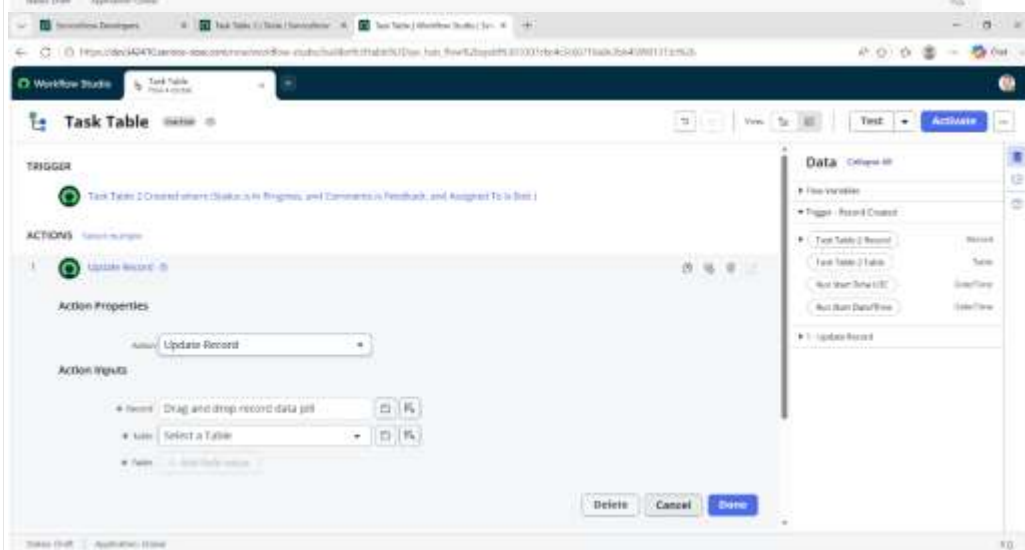

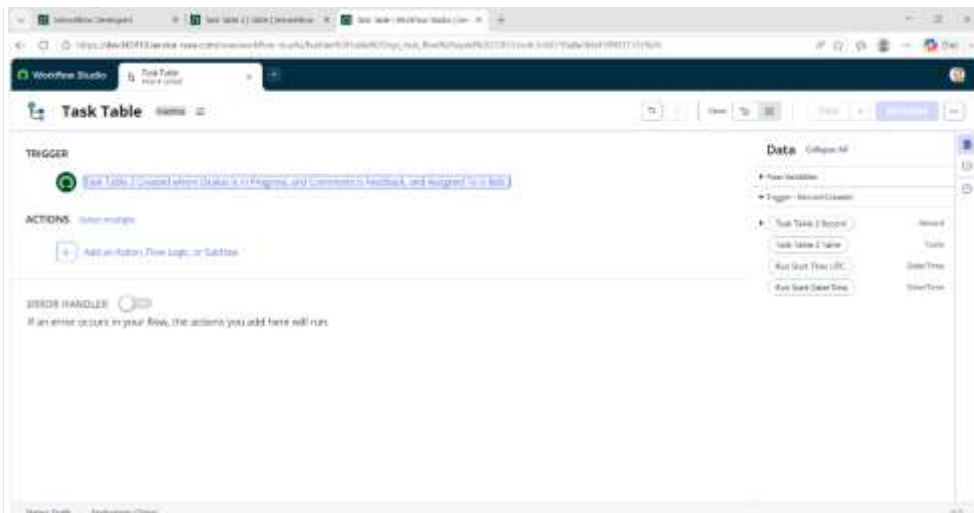

## F. Automation & Workflow Optimization

Create a Flow to Assign Operations Ticket to Group

Workflow Studio

Task Table

Test

Activate

TRIGGER

Task Table 1 Created when status is in Progress, and Comments is Feedback, and Assigned To is Bob

ACTIONS

Update Task Table 1 Record

Add an Action, Flow Logic, or SubFlow

ERROR HANDLER

If an error occurs in your flow, the actions you add here will run.

Data

Columns: All

Task Table 1 Record

Task Table 1 Table

Run Task Table 1

Run Task Table 1

## G. Testing & Validation

### Workflow Execution Testing

## H. Project Conclusion

The implementation demonstrates an organized project management setup with clearly defined roles and workflow-driven task execution. Structured tables enable efficient tracking of projects, tasks, and progress, while controlled access ensures accountability and smooth collaboration. This approach supports clear communication and contributes to successful project delivery.
